

Edit

Organization Units

Organization units (OU) are used to hierarchically group user and entities. Then you can get user or entities based on their OUs. When we click Administration/Organization units, we enter the related page:

Organization Units

Use organization units to organize users and entities

Organization tree

+ Add root unit

- Producing 5 members, 0 roles
 - Research & Development 3 members, 0 roles
 - IVR Related Products 2 members, 0 roles
 - Voice Technologies 1 members, 0 roles
 - Inhouse Projects 1 members, 0 roles
 - Quality Management 3 members, 0 roles
 - Testing 2 members, 0 roles
- Selling 1 members, 0 roles
 - Marketing 2 members, 0 roles
 - Sales 3 members, 0 roles
 - Customer Relations 1 members, 0 roles
- Supporting 1 members, 0 roles
 - Buying 1 members, 1 roles**
 - Human Resources 2 members, 0 roles

Members Roles

+ Add member

Delete	User name	Addition time
	andrew.andrewus	04/08/2019
	biff.tannen	04/08/2019
	franz.kafka	04/08/2019

Total: 3

Here, we can manage OUs (create, edit, delete, move), members of organization units (add/remove) and roles of organization units. When a role is added to an organization unit, all members of that organization unit are granted with the permissions of the role. In that way, you can easily assign a role to all users of an organization unit.

In the left OU tree, we can **right click** to an OU to open **context menu** for OU operations.

We can also add new members with the upper right button of members tab.

Select	Name
<input type="checkbox"/>	admin admin (admin@acme.com)
<input type="checkbox"/>	Andrew Andrewus (andrew.andrewus@outlook.com)
<input type="checkbox"/>	Audrey Naulin (audrey.naulin@live.com)
<input type="checkbox"/>	Biff Tannen (biff.tannen@hotmail.com)
<input type="checkbox"/>	Christophe Grange (christophe.grange@aspnetzero.com)
<input type="checkbox"/>	Christopher Nolan (christopher.nolan@aspnetzero.com)
<input type="checkbox"/>	Clarice Starling (clarice.starling@live.com)
<input type="checkbox"/>	David Wells (david.wells@yahoo.com)
<input type="checkbox"/>	Forrest Gump (forrest.gump@hotmail.com)
<input type="checkbox"/>	Gabriel Marquez (gabriel.marquez@outlook.com)

This is actually a **generic lookup modal** and can be used to select any type of entity (see `app/shared/common/lookup/common-lookup-modal.component`).

We can also add new roles with the upper right button of roles tab. **common-lookup-modal** is used to build the role selection modal here as well.
